CONCERNING THE NEW NUMBERING RANGE IN LITHUANIA

We would like to inform you that on 28 February 2011 the new numbering range of +370 706 XX XXX (hereinafter referred to as the Numbering range) was added to the National Telephone Numbering Plan of the Republic of Lithuania. This Numbering range has been included in the Numbering Plan of International Telecommunication Union (ITU-T) (<http://www.itu.int/oth/T020200007C/en>) and it is used by government institutions and organizations in Lithuania.

Regretfully, we have received more than a few complaints that users of the telephone numbers in this Numbering range regularly do not receive calls from other countries. Communication operators in Lithuania have pointed out that problems with accessibility of this Numbering range arise as not all communication operators in other countries redirect the calls to the networks of our country operators.

On 1 July 2013, the Republic of Lithuania will have the honor to start its Presidency of the Council of the European Union. The traffic of international calls during the second half of 2013 will naturally increase and the problem of accessibility of this Numbering range will become more acute and may negatively influence important communication.

Operators in Lithuania have already informed their foreign partners about the existing Numbering range, but in order to reach the largest possible number of telecommunications service providers and to eliminate this misunderstanding in the near future we kindly ask you to inform all the telecommunications service providers in your countries to direct all calls dialed using numbers from the +370 706 XX XXX range to the Republic of Lithuania.

We thank you for your understanding and helpful approach regarding this issue.
